DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7 March 2008 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. **Claims 1-26 and 35-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Taylor (6,254,642) in view of Hasson (5,658,272).** Taylor discloses a device having an evacuator (52, see figures 7-10) capable of reducing the stomach and a fastener (11). The fastener is applied using a pusher (55). However, Taylor does not disclose an expandable structure that the evacuator extends through. Attention is drawn to Hasson reference, which teaches the use of an expandable member (34, see figure 7) to be inflated to prevent premature withdrawal of the surgical instrument before the operation is completed (see column 4, lines 41-44). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was

made to include the expandable member of Hasson with the device of Taylor to prevent premature withdrawal of the surgical instrument.

Response to Arguments

4. Applicant's arguments filed 07 March 2008 have been fully considered but they are not persuasive. Applicant argues the fastener of the combination is positioned distal to the expandable structure. However, after the fastener is secured in place and the expandable structure withdrawn proximally from the body, the fastener is positioned distal to the expandable structure. The claims do not specify when during the operation the fastener must be positioned distal to the expandable structure, and therefore the interpretation set forth above is proper.

Conclusion

5. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

6. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
